HING

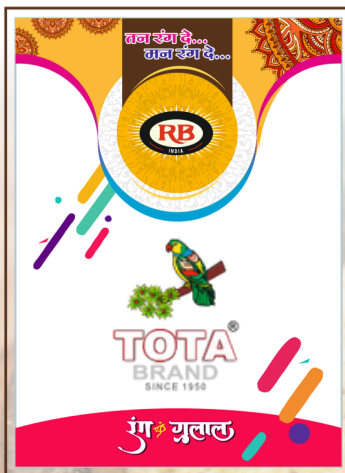

“ Asafoetida Products offered by us used as a flavouring agent and forms a constituent of many spice mixtures. They are used to flavour, curries, meatballs, dal and pickles. The asafoetida is used as a flavouring ingredient in foods and beverage. Asafoetida is made from a type of gum-resin extracted from the roots Of ferula, an herb plant in the celery family. Asafoetida products are made for commercial and culinarily uses. ”
